

Caliper Life Sciences develops and sells innovative and enabling products and services to the life sciences research community, a customer base that includes pharmaceutical and biotechnology companies, as well as government and other not-for-profit research institutions. Caliper is committed to providing translational research technology and services focused on further realizing the full potential of personalized medicine. Our offerings leverage an extensive portfolio of imaging, tissue analysis, microfluidics, automation and liquid handling technologies, instruments, software and reagents, discovery and development outsourcing solutions, and scientific applications expertise to address key opportunities and challenges researchers encounter. Caliper's headquarters are located in Hopkinton, Ma, and the company maintains direct sales, service and applications support throughout the world. Key forces driving Caliper's business include:

- Innovative research and development platforms that enable personalized medicine applications including molecular and companion diagnostics
- Commanding intellectual property estate
- Broad and established customer base
- Experienced management with established relationships throughout the life sciences research community
- Global commercial infrastructure
